

STATINTL

10 April 1974

NOTE FOR: Mr. Brownman

Paragraph 1 is of particular interest to the DDO because of strong concern about the security classification of computer output. The Office of Security is in agreement with the issuance.

Paragraph 2 is of interest to MSAG, and it is on the agenda for the meeting of 23 April 1973. If you are in agreement that the two items might be "married," RCS can put it in the coordination process, and we can pick up points with MSAG in acting quite quickly on a pretty good suggestion. I have reason to know that Harry Fitzwater has no problem with the suggestion. I would propose no expiration date at this point.
